

PRIVATE ENGAGEMENT REPORT / ILLUSTRATIVE EXTRACT

Observation and sealing report

Packaged olive oil · filling, closure and controlled sealing

Report reference
DEMO-REPORT-OLIVE-01

Revision
DEMO R04 · illustrative only

Illustrative example — not a real engagement or laboratory result.

TG observation reference DEMO-RUN-OLIVE-01	Manufacturer batch DEMO-BATCH-OLIVE-A	Illustrative attendance 15 September 2030 10:00–10:30 · fictional
---	--	---

01 Engagement summary

Observation of filling and closure, followed by controlled sealing of twelve 500 ml olive-oil bottles. The example records the covered packages and reconciles issued seal stock.

Covered packaging 12 bottles	Attendance One defined observation	Laboratory evidence No laboratory report recorded.
---------------------------------	---------------------------------------	---

Other agreed scope, evidence and release requirements are assumed complete for this fictional extract. Absence of a laboratory report alone is neither a laboratory failure nor an incomplete TG engagement.

02 Scope and coverage

Included in the example

- Observe filling and closure during the agreed production activity.
- Observe factory staff applying seals under TG control.
- Record labels, check package assignments and reconcile seal stock.

Outside the recorded scope

- Other stock, later batches, separately scoped production activity and transit.
- Composition, grade, origin and safety determinations.
- Laboratory testing and the laboratory's separate report.

Laboratory testing is optional and separately charged. It is an independent third-party service outside TG's observation engagement and report.

Observation and package records

Illustrative example — not a real engagement or laboratory result.

03 Observation record

Illustrative attendance window: 15 September 2030, 10:00–10:30. The entries below organise the fictional observations; they are not real inspection findings.

Activity and the basis of the record

Activity	Recorded observation	Basis / reference
Filling and closure	The TG observer witnesses filling and closure of the covered bottles.	Direct observation DEMO-EVID-OBS
Seal application	Factory staff apply seals under TG observation and control.	Direct observation DEMO-EVID-SEALS
Package assignment	The TG observer checks the individual package identifiers against the assigned list.	Observed check of supplied information DEMO-EVID-MANIFEST

Manufacturer batch DEMO-BATCH-OLIVE-A is supplied information in this example. Recording an identifier does not independently establish its origin or the contents of a bottle.

04 Package manifest and seal reconciliation

Twelve individual package identifiers assigned to TG observation reference DEMO-RUN-OLIVE-01. Membership is explicit; it is not inferred from a serial range.

DEMO-PACK-ALPHA	DEMO-PACK-BRAVO	DEMO-PACK-CHARLIE
DEMO-PACK-DELTA	DEMO-PACK-ECHO	DEMO-PACK-FOXTROT
DEMO-PACK-GOLF	DEMO-PACK-HOTEL	DEMO-PACK-INDIA
DEMO-PACK-JULIET	DEMO-PACK-KILO	DEMO-PACK-LIMA

Fictional DEMO labels only. No production serials have been issued.

Issued	Applied	Voided / damaged	Outstanding
14	12	2	0

14 issued = 12 applied + 2 voided/damaged + 0 outstanding.

Evidence and document control

Illustrative example — not a real engagement or laboratory result.

05 Evidence index

Illustrative references show how the report would connect to supporting material. No attachments or third-party documents are supplied.

DEMO-EVID-OBS	Attendance notes / observation photographs Not included in this demonstration.
DEMO-EVID-SEALS	Seal application and stock log Not included in this demonstration.
DEMO-EVID-MANIFEST	Package assignment record Twelve fictional entries shown in section 04; source material not included in this demonstration.

06 Review, limits and document control

Review record

Reserved for the reviewer, review date, release authorisation and revision history in an issued report. No person has signed or approved this fictional engagement.

DEMO R04 identifies this illustrative presentation only.

Limits of the findings

Coverage is limited to the activity and twelve packages identified here. It does not establish product composition, grade, origin, clinical safety or regulatory approval, or inspect the seal's present physical condition.
